Outline of lecture for Unit II:
Ancient Egyptian Writing

I. Linguistic background

- A. Meaning of "hieroglyph(ic)"
- B. Egyptian language: one of six branches of Afro-Asiatic (or "Hamito-Semitic") family.

II. The origins of Egyptian hieroglyphic writing

- A. Forerunners of hieroglyphic writing
 - 1. Labels and tags from Abydos tomb U-j
 - 2. The palette of Narmer
- B. Comparison of early stages of Sumerian cuneiform and Egyptian hieroglyphic scripts.
 - 1. Which writing is older, Sumerian or Egyptian?; did one derive from the other?
 - 2. No definite answer to these questions (yet).

III. The graphic system of hieroglyphic Egyptian

- A. Logo-syllabic like other early systems, but with unusual features, especially with regard to treatment of vowels, which are not represented at all.
- B. Types of graphs
 - 1. Logograms
 - 2. Phonograms (consonant-syllabic type, with vowel unspecified)
 - a. Uniliteral/uniconsonantal (type C^x) (26 characters); derivation by **acrophonic principle**, e.g. *n* < *nt* 'water'
 - b. Biliteral/biconsonantal (C^xC^x) (ca. 80)
 - c. Triliteral/triconsonantal (C^xC^xC^x) (ca. 70)
 - 3. Classifiers or semantic determinatives (ca. 150); see HANDOUT III.2
- C. Functions and combinations of basic sign types
 - 1. Multiple functions of many graphs: e.g. *pr* 'house' as logograph, biliteral phonogram, and semantic determinative.
 - 2. Phonetic complements
 - a. Partial phonetic complementation (e.g., *ḥd-d*)
 - b. Full phonetic complementation (e.g., *ḥd-ḥ-d*); principle of **redundancy**
 - 3. Homophonic and semantic extension, e.g. *ḥd* 'mace' = *ḥd* '(be) bright' > *ḥd* 'silver', etc.; see HANDOUTS III.3, 4
- D. Analysis of an example of a hieroglyphic text (HANDOUT III.5 < Hooker p. 107).

IV. Hieratic and demotic Egyptian

- A. Hieratic: simplified form, or rather "style" of writing, with **cursivization** and **abstraction** of hieroglyphic graphs.
- B. Demotic: further simplified and cursivized later script; development of **ligatures**.

V. Scripts developed from or influenced by Egyptian writing

- A. Coptic (Egyptian Christian) alphabet: Based on Greek alphabet, but with 6 supplementary characters borrowed from demotic Egyptian.
- B. Meroitic script (Sudan): indirect adaptation from Egyptian, with fundamental typological shift and unusual features.
- C. Luvian ("Hittite") hieroglyphic script (Asia Minor)
- D. Proto-Sinatic/proto-Canaanite consonant syllabary; ancestor of the European alphabet
